

This is a short guide aimed at showing how to configure Dropbox to enable the SimSage Dropbox crawler. This crawler only works with individual accounts (not Team). If you do have a Dropbox Team subscription, you can copy all your files into your personal folder of your Dropbox account. This will enable this crawler to see those files.

Visit <https://www.dropbox.com/developers> and sign-in to your Dropbox account.

Click “App console”

Click “Create app”

Rock de Vocht ▾

Create a new app on the DBX Platform

1. Choose an API

- ☒ Scoped access **New**
Select the level of access your app needs to Dropbox data. [Learn more](#)

2. Choose the type of access you need

[Learn more about access types](#)

- ☐ App folder – Access to a single folder created specifically for your app.
- ☒ Full Dropbox – Access to all files and folders in a user's Dropbox.

3. Name your app

SimSage crawler

Create app

Select “Scoped access”

Select “Full Dropbox”

Name your app whatever you like, the example shown uses “SimSage crawler”.

Click “Create app”

Creating a Dropbox app

- 1 **Configure app settings**
Name your app and choose initial settings.
- 2 **Select access scopes**
Choose the access scopes, or specific permissions, that your app needs to interact with Dropbox. We recommend starting small and adding more permissions later if you need them. [Get started](#)
- 3 **Add branding**
Give your users important information about your Dropbox app. Should comply with the Dropbox developer branding guide. [Get started](#)

Individual scopes

Individual scopes include the ability to view and manage a user's files and folders. [View Documentation](#)

Account info

Permissions that allow your app to view and manage Dropbox account info

- ☐ `account_info.write` View and edit basic information about your Dropbox account such as your profile photo
- ☒ `account_info.read` View basic information about your Dropbox account such as your username, email, and country

Files and folders

Permissions that allow your app to view and manage files and folders

- ☐ `files.metadata.write` View and edit information about your Dropbox files and folders
- ☒ `files.metadata.read` View information about your Dropbox files and folders
- ☐ `files.content.write` Edit content of your Dropbox files and folders
- ☒ `files.content.read` View content of your Dropbox files and folders

Collaboration

Permissions that allow your app to view and manage sharing and collaboration settings

- ☐ `sharing.write` View and manage your Dropbox sharing settings and collaborators

Click Submit when you are done making changes. (Existing access tokens will not be affected)
