

OpenText Content Manager Crawler Documentation

- [Introduction](#)
- [Prerequisites](#)

Introduction

In this document, we will cover how to navigate, create and use the *OpenText Content Manager Crawler* in the Admin Interface.

Prerequisites

For our crawler, we require the following credentials:

- **Username** - the email address associated with the *admin* account we want to *crawl* data from
- **Password** - the password of your *admin* account (respective of email)
- **Server** - the server endpoint of Content Manager. This value must start with `http://` or `https://` and end in `/ContentManager`
- **Domain** - Optional: the domain of your remote server
